Product Owner

Why join us?

SURGAR is a fast-growing startup working on the development of **augmented reality software for minimally invasive laparoscopic surgery**. SURGAR has won several innovation awards (i-Lab 2019 and i-Nov 2024) and national and international calls for projects. It benefits from a strong partnership with an internationally recognized surgical department and a leading computer vision laboratory. Our software is based on cutting-edge technology designed to improve the safety, accuracy, and efficiency of the surgical procedure. We are a deeptech startup based on over 15 years of fundamental and clinical research. On our website, you will discover the performance of our software (www.surgar-surgery.com). We are creating a technology that is changing surgeons' practices.

You will work in the Marketing and Sales department in close contact with the Design and development department, in a human-sized company. We attach great importance to the well-being of our employees, and to respect our corporate values: excellence, innovation and customer satisfaction. SURGAR is based in Clermont-Ferrand, where the quality of life is excellent!

The opportunity

We are seeking an **accomplished Product Owner** to join our **marketing and sales team**.

Key Responsibilities

- Collaborate with business stakeholders to define the product vision, strategy, and roadmap that aligns with company goals and customer needs.
- Create, prioritize, and manage the product backlog, ensuring that it is aligned with business objectives and development teams' capacity.
- Work closely with stakeholders to gather, document, and prioritize product requirements, features, and user stories.
- Act as the primary point of contact for development teams, designers, and other departments to ensure successful product development and delivery.
- Communicate product updates, progress, and timelines to internal stakeholders, ensuring alignment and managing expectations.
- Advocate for the end user by ensuring that product features meet customer needs and deliver exceptional user experiences.
- Collaborate with Quality and Development teams to ensure proper testing of features and resolve any issues that arise during the development lifecycle.
- Analyze product performance metrics, gather user feedback, and continuously iterate on the product to drive improvements and achieve business outcomes.

- Conduct market research to identify emerging trends and competitive positioning.
- Maintain a deep understanding of the visualization techniques in Minimally Invasive Surgery and related technologies.

You

Required qualifications:

- Bachelor's or master's degree in biomedical engineering, or a related field.
- 2+ years in product management, with significant experience in surgical active medical devices and/or medical imaging.
- Ability to identify market trends
- Understanding of competitive landscapes and positioning strategies
- Experience in pricing strategies, make vs. buy decisions, cost optimization, and profit margin analysis.
- Ability to interact with customers to understand their technical and business needs
- Capability of delivering clear and compelling product presentations to customers and stakeholders
- Ability to network with all levels of customers' organizations.
- Strong organizational skills to oversee multiple projects, meet deadlines, and manage budgets
- Possession of good cross-functional collaboration skills.

Preferred qualifications:

- An MBA is a plus.
- Expertise in AI-powered medical devices, medical imaging.

Personal qualities:

- Excellent ability to collaborate with healthcare professionals, sensitive to the constraints and requirements of end-users (surgeons, radiologists),
- Excellent ability to collaborate with peers and colleagues,
- Autonomy, rigor and ability to work in a regulated and highly secure environment,
- Interest in technological innovations in the medical field and ability to translate medical challenges into technical solutions.

Benefits:

- Participation in projects with a direct impact on improving healthcare.
- Close collaboration with leading research teams and renowned healthcare professionals.
- Stimulating work environment with prospects for advancement in a high-potential sector.
